

Create your web portfolio!

1. Using Dreamweaver, create a new site, but make your entire *B232 Web Page Design* folder your web folder in the site definition.
2. Create a new document as **index.html** in the main B232 Web Page Design folder. DO NOT SAVE IT IN ANY SUBFOLDERS.
3. Make sure you add a page title and feel free to select page background, text, and link colors. (Modify/Page Properties)
4. Create and insert a header graphic from Fireworks or PhotoShop and title it "(Your Name)'s Web Portfolio."
5. Create a table like the following:

Intro to Web Design & HTML	Intro to Graphics & Dreamweaver
Posting	Flash
Advanced Dreamweaver	Integrated Project
Notes/Other	Challenge

6. Add in shading, formatting, and any graphics as you desire. THIS IS AN OPPORTUNITY TO SHOWCASE YOUR WORK—MAKE IT PERSONAL TO YOU!
7. Under each category, list all the projects you have completed and LINK them to the appropriate index.html page for each project. It should look something like this: **DO NOT USE JUST THE PROJECTS LISTED HERE! YOU WILL HAVE MORE THAN THIS!!!**

Josh's Web Portfolio

Intro to Web Design & HTML	Intro to Graphics & Dreamweaver
Good Sites Bad Sites Fan Club Activity HTML Practice 1	Search Engines Favorite Web Sites Assessment
Posting	Flash
Web Hosting Activity	Godzilla Name Assessment
Advanced Dreamweaver	Integrated Project
Assessment	Assessment
Notes/Other	Challenge
Web Topic Presentation	HTML Tables

8. When done, post your entire folder to the server.
9. Please let your teacher know when you are done so your portfolio can be burned to a CD.
10. GREAT JOB!

EXTRA CREDIT CHALLENGE:

Create your Portfolio page in FLASH!!!!
